Fröbel Set
20个 | PIECES

在开发“墙面滚珠”的过程中，我认为滚珠的滚动速度不应该过快，这样的话，即使年龄很小的孩子，也可以清楚的看到珠子在轨道上的运动状态，这点我觉得非常重要。不同的滚珠轨道可以以各种角度拼插到墙面上，这就给了滚珠玩法无限的可能性。为了创造出最合适的滚珠轨道，玩家需要轻微的调整滚珠轨道的位置，从而让滚珠能够以正确的轨道到达终点。这种玩法不仅可以让孩子锻炼专注力，还可以提高孩子们的逻辑思维能力，当然，孩子也可以获得很多的成就感和乐趣。

During the development of the "Plug it marble run" it was very important for me that the wooden marble doesn't move too fast and that the movement can also be noticed visually by small children. The different marble run elements can be plugged on the wall in all directions and there are endless possibilities of variation. In order to create the optimal marble course, the position of the individual marble run elements has to be changed slightly and rearranged so that the marble finds the way to the end. This needs concentration and promotes analytical thinking and of course a lot of fun.
